In business, it's a fact of life that teams sometimes get off the track. A challenging marketplace, tough competition, higher quotas—all these factors can lead to a dip in momentum. You can start taking your job for granted and lose your passion for achieving the mission. Teams can even take each other for granted and team unity goes out the window. Worse yet, you take your spouse or kids for granted and have major difficulties at home.

In difficult economic times, many people tend to make excuses, focus on what's not working, and become disillusioned— if you are a leader, a disengaged team is not good for your bottom line. But it doesn't have to be this way!

Are you “switched on”? Switched On – for every phone call, every meeting, every appointment, every time you walk in the door at home – it pays big benefits. How do you currently prepare for those key moments? When was the last time you re-evaluated your entire routine for living your life? In this exciting and dynamic presentation, “Get Switched On!” Chip shows you how to help you recapture the power of momentum so you can **get plugged back in and switched on!**

"I just want to say thank you for helping me realize that I needed to get my life back and focus on some certain areas in my life. You helped me with that little extra push and motivation that I needed and I was ready and commit to myself and no more excuses!

"After getting Switched On, I framed the Get Switched On! Questions at my desk, joined a gym, hired a personal trainer, and got educated on establishing and maintaining a healthy lifestyle. From April – December I lost 50 lbs., dropped 6 dress sizes, and I'm in the best shape that I've been in for years. I have two bad legs so I am limited to what I can do and I had surgery on one in August, was on crutches for two months and still did it!" - *Deb Anderson, CNA Surety*
